Electronic Shopping & Mail-Order Houses	4541	\$1,637,903	\$0	\$1,637,903	100.0	0
Vending Machine Operators	4542	\$134,739	\$0	\$134,739	100.0	0
Direct Selling Establishments	4543	\$421,794	\$0	\$421,794	100.0	0
Food Services & Drinking Places	722	\$16,652,753	\$24,506,371	-\$7,853,618	-19.1	32
Special Food Services	7223	\$195,446	\$0	\$195,446	100.0	0
Drinking Places - Alcoholic Beverages	7224	\$579,582	\$551,906	\$27,676	2.4	1
Restaurants/Other Eating Places	7225	\$15,877,725	\$23,954,465	-\$8,076,740	-20.3	30

Data Note: Supply (retail sales) estimates sales to consumers by establishments. Sales to businesses are excluded. Demand (retail potential) estimates the expected amount spent by consumers at retail establishments. Supply and demand estimates are in current dollars. The Leakage/Surplus Factor presents a snapshot of retail opportunity. This is a measure of the relationship between supply and demand that ranges from +100 (total leakage) to -100 (total surplus). A positive value represents 'leakage' of retail opportunity outside the trade area. A negative value represents a surplus of retail sales, a market where customers are drawn in from outside the trade area. The Retail Gap represents the difference between Retail Potential and Retail Sales. Esri uses the North American Industry Classification System (NAICS) to classify businesses by their primary type of economic activity. Retail establishments are classified into 27 industry groups in the Retail Trade sector, as well as four industry groups within the Food Services & Drinking Establishments subsector. For more information on the Retail MarketPlace data, please click the link below to view the Methodology Statement. <http://www.esri.com/library/whitepapers/pdfs/esri-data-retail-marketplace.pdf>

Restaurants/Other Eating Places	7225	\$293,438,177	\$499,834,176	-\$206,395,999	-26.0	704

Data Note: Supply (retail sales) estimates sales to consumers by establishments. Sales to businesses are excluded. Demand (retail potential) estimates the expected amount spent by consumers at retail establishments. Supply and demand estimates are in current dollars. The Leakage/Surplus Factor presents a snapshot of retail opportunity. This is a measure of the relationship between supply and demand that ranges from +100 (total leakage) to -100 (total surplus). A positive value represents 'leakage' of retail opportunity outside the trade area. A negative value represents a surplus of retail sales, a market where customers are drawn in from outside the trade area. The Retail Gap represents the difference between Retail Potential and Retail Sales. Esri uses the North American Industry Classification System (NAICS) to classify businesses by their primary type of economic activity. Retail establishments are classified into 27 industry groups in the Retail Trade sector, as well as four industry groups within the Food Services & Drinking Establishments subsector. For more information on the Retail MarketPlace data, please click the link below to view the Methodology Statement. <http://www.esri.com/library/whitepapers/pdfs/esri-data-retail-marketplace.pdf>
